

# REMINDERS & RECOMMENDATIONS

**LINTEC SCRATCH RESISTANT PRINTABLE TOPCOATS ON FILMS SUCH AS *E-2100ZC* AND *E-2200ZC* ARE NOT DESIGNED FOR COMPATIBILITY WITH OVER-LAMINATING FILMS.**

**We recommend using our non-scratch-resistant films.** Our high tack removable MF adhesive, in products like the *ECO 2001RC* and *ECO 2306RC*, is made to adhere to glass, polycarbonate, and acrylic.

Some clients have installed safety film and these constructions were never intended to be laminated on top of any type of existing film.
